

Wiebe - von Riesen Genealogy

The following pages trace our Wiebe ancestry back to Heinrich Wiebe, my great great great grandfather, 1771-1838. His wife Helene Neufeld's lineage includes two additional generations to my great great great great great grandparents, Gerhard Andres 1729-1809 and Catharina Wiebe, 1736-1788.

The earliest von Riesen ancestor listed here is Cornelius von Riesen born around 1700 and his wife Gertrude Wiebe. They were my great great great great grandparents.

The information included here has been gathered from various sources over a period of approximately nine years. The Heubuden Church records have been researched as well as those of the Halstead Mennonite Church.

Letters have been written to relatives and other connections in Germany as well as the United States. Some of the dates may not be entirely accurate as there are discrepancies at times between sources, but we shall continue our search.
