

INTRODUCTION

This family tree book of my Grandfather Johann Thiessen is the result of approximately three years of research. It has been an enjoyable challenge. The information in this book was compiled as a result of the response of my family tree members.

We hope there have been a minimum of errors. Those which may occur are unintentional, and we beg your understanding.

We appreciate the cooperation we received and hope that this book will be a source of information for many generations to come.

A special thanks to Peter Buller for his encouragement, and to my daughter Wanda, for her help typing and compiling the book.
